# NANOTEHNOLOGIJA Z EKSPERIMENTI IN NANOVARNOST V IZOBRAŽEVANJU

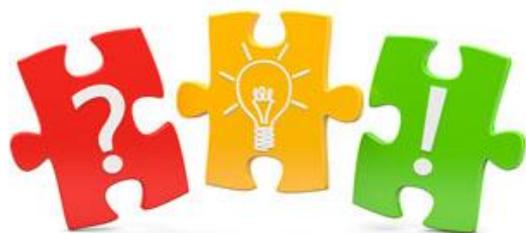

**Andreja Bačnik in Simona Slavič Kumer**

**Zavod RS za šolstvo**

8. Posvet KEMIJSKA VARNOST ZA VSE, Izola, 2016

# Namen prispevka

## KAJ IN KAKO Z NANOVARNOSTJO V ŠOLI?

Predstavili bova:

- možnosti za vključevanje nanotehnologije in nanovarnosti v pouk glede na UN naravoslovnih predmetov v OŠ in SŠ,
- dejavnosti, ki spodbujajo razvijanje razumevanja, kritičnega mišljenja učencev in ozaveščajo o nanovarnosti,
- primere projektov in gradiv za dejavnosti skupnosti Scientix...
- ...

# Kaj nam je lahko v pomoč v „gozdu nanotehnologije“?

**Informacijska grafika** *ali* info-grafika = grafični vizualni prikaz informacije, podatkov ali znanja z namenom predstaviti kompleksno informacijo hitro in pregledno.

poenost. = predstavitev podatkov na zanimivejši (zabavnejši) in hitrejši način

**Info-grafike in njihova priprava** lahko izboljšajo kognicijo in vizualizacijske sposobnosti (prepoznavanje vzorcev in trendov).

Ref. „data visualization“, „information design“ ali „information architecture“

Zelo uporabne infografike za naravoslovje, kemijo najdete na:  
[www.compoundchem.com](http://www.compoundchem.com)

# EVERYDAY USES OF NANOTECHNOLOGY

National Nanotechnology Day (Oct. 9) is a yearly event in the U.S. to celebrate the tiny tech. Here, we take a look at various consumer products that utilize nanotechnology and the chemistry behind them.

## WHAT IS NANOTECHNOLOGY?

SALT GRAIN = 100,000 nm

NANOPARTICLES = 1-100 nm

Nanotechnology involves the applications of nanoparticles, which are collections of atoms or molecules less than 100 nm across. Because of their small size, the particles have properties that can differ from those of larger amounts of the same material.

## ANTIMICROBIAL USES

Products such as bandages, soaps, and surgical implements use silver nanoparticles for their antimicrobial effects. However, the particles' effectiveness in some applications has been questioned, and the materials may cause environmental problems.

## SUNSCREENS

Many sunscreens contain titanium dioxide and/or zinc oxide nanoparticles because the materials can absorb UV radiation. Titanium dioxide also finds use in some foodstuffs as a whitening agent.

## CLOTHES

SILVER ANTIMICROBIAL

SILICA WATER-REPELLENT

TiO<sub>2</sub>/ZnO UV-ABSORBING

ANTIMONY-DOPED TIN OXIDE ANTISTATIC

UV-absorbing titanium oxide and zinc oxide nanoparticles can be incorporated into clothes to prevent sunburn and sometimes to act as antistatic agents. Silicon dioxide nanoparticles can prevent stains and help clothing repel water.

## SPORTS EQUIPMENT

CARBON NANOTUBES

100 TIMES AS STRONG AS STEEL

ONE-SIXTH THE WEIGHT OF STEEL

AS STIFF AS DIAMOND

Sports equipment such as tennis rackets and bicycles are sometimes built using nanomaterials including carbon nanotubes. The nanotubes improve strength and durability and decrease weight. Titanium nanoparticles can also be used.

## QUANTUM DOTS

Quantum dots, which are nanoparticles of semiconductors such as cadmium selenide, absorb light of one color, such as blue light, and emit it as another depending on particle size. The particles are more energy-efficient than light-emitting diodes.

**Projektno delo – avtentični problemi**

**Onesnažen zrak ubija**

Objavljeno: 30.03.2014 15:00 | Posodobljeno: 30.03.2014 15:00  
Avtor: U.S.  
Ključne besede: zrak, onesnaženje

Svetovna zdravstvena organizacija opisuje onesnažen zrak kot največji okoljski dejavnik tveganja za zdravje. Strokovnjaki ga ne povezujejo samo z boleznimi dihalnih poti, ampak tudi z boleznimi srca in možgansko kapjo.

**Različne dejavnosti**

**NANOYOU: Memory Game**

Test your memory with this memory game: find nanoscience and technology terms.

There are different definitions of nanoscience, nanotechnology and nanomaterials. Select a definition and test your memory!

You can download the cards and the instructions on how to play the game.

# EKSPERIMENTI z NANO

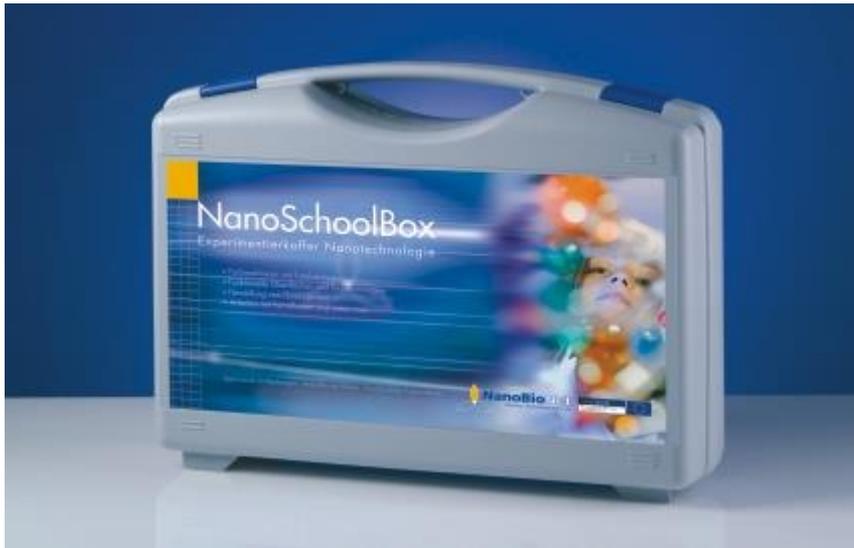

**EKSPERIMENT** ali **poskus** (*nlat. experimentum iz lat. experiri – izkusiti, poskusiti, preiskati*)

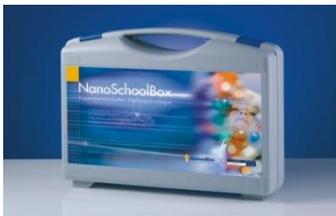

je znanstveni postopek in temelj pouka naravoslovnih predmetov.

Z eksperimenti otroci/učenci/dijaki spoznavajo osnovne naravoslovne pojme in pojave, poglobljajo razumevanje, povezujejo znanje in razvijajo eksperimentalno raziskovalne veščine. Z eksperimenti ugotavljamo, raziskujemo, dokazujemo, potrjujemo ali zavračamo hipoteze in teorije.

# EKSPERIMENTALNI KOVČKI/ KOMPLETI ZA NANO

# Zbirka eksperimentov NanoSchoolBox

## *Od lotosovega efekta do tehničnih aplikacij nanoslojev*

- 1. Opazovanje lotosovega efekta
- 2. Hidrofobna površina na lesu ali na kamnih
- 3. Hidrofobna površino na tekstilnem materialu
- 4. Nevidno črnilo za steklo – tvorba hidrofilne površine (anti fog)

## *Funkcionalnost z nanotehnologijo*

- 5. Les odporen na praske
- 6. Zaščita pred ognjem
- 7. Povečanje električne prevodnosti skozi ITO (indij kositrov oksid)

## *Uporaba titanovega dioksida v nanotehnologiji*

- DEMO: Polobla s flip-flop efektom
- 8. Fotokataliza s titanovi dioksidom

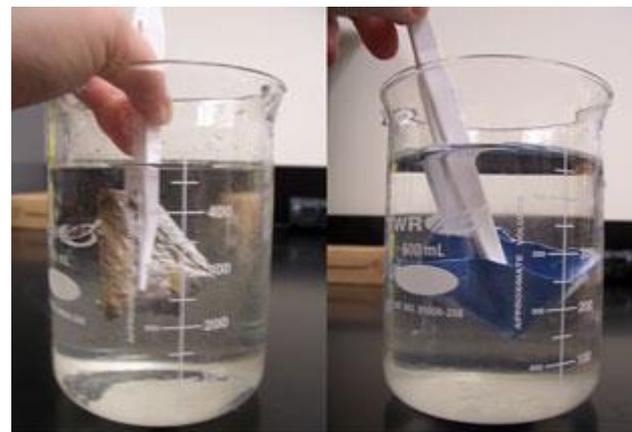

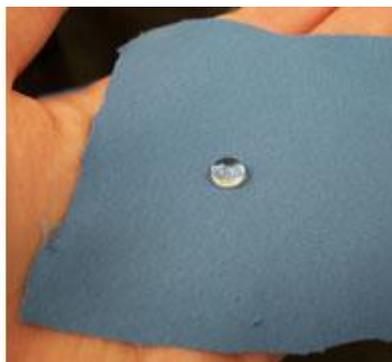

## **Ferofluidi**

- 9. Magnetno polje
- 10. Ločevanje na osnovi gostote s ferofluidi

Itd. → npr. 13. Spominska kovina...

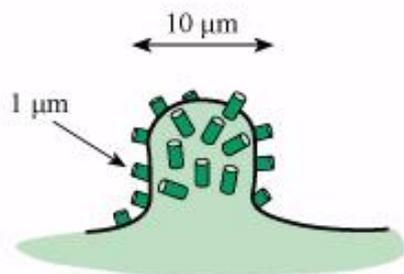

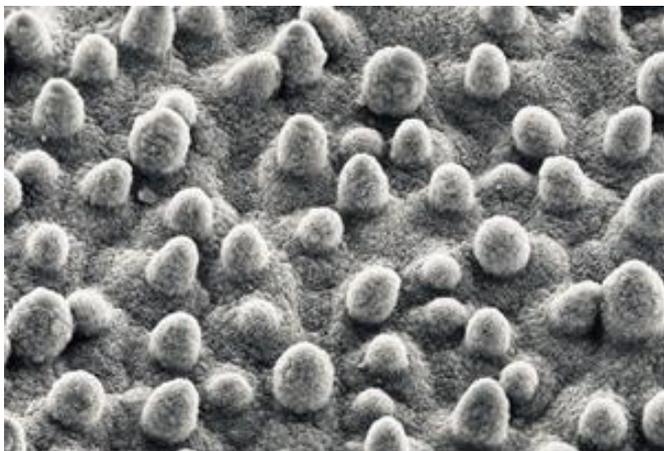

# Eksperiment 1: Opazovanje lotosovega efekta

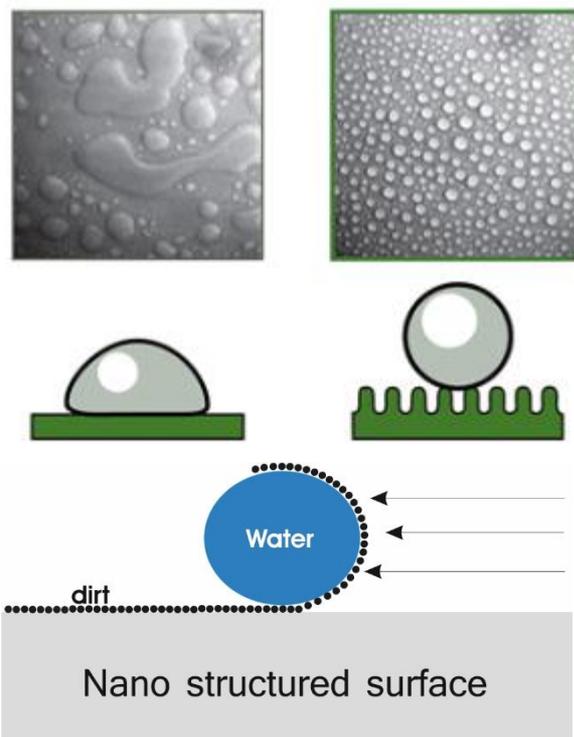

## Nadgradnja: vpliv površinsko aktivnih snovi na lotosov efekt

# Lotusov efekt - samočistilna sposobnost površine lista

Voščena površina lotusovega lista je pokrita z drobnimi izrastki, na katerih so od nekaj nm do  $\mu\text{m}$  velike cevaste tvorbe iz voska.

Lotusov učinek omogočajo mikrostrukture na listni površini in v njih ležeči voščeni kristali. Na vodoodbojni površini se ne moreta obdržati ne voda, ne prah.

# Možnosti vključevanja v vsebinske sklope:

## Osnovna šola

- Naravoslovje: Zgradba in delovanje rastlin
- Biologija: Biologija kot veda, Biologija in družba
- Kemija: Maščobe, Mila

Medpredmetno  
povezovanje

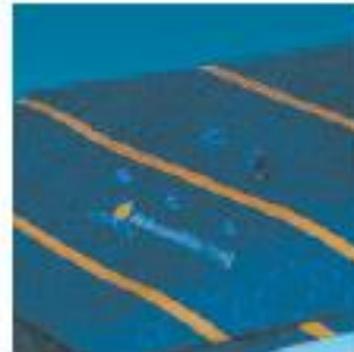

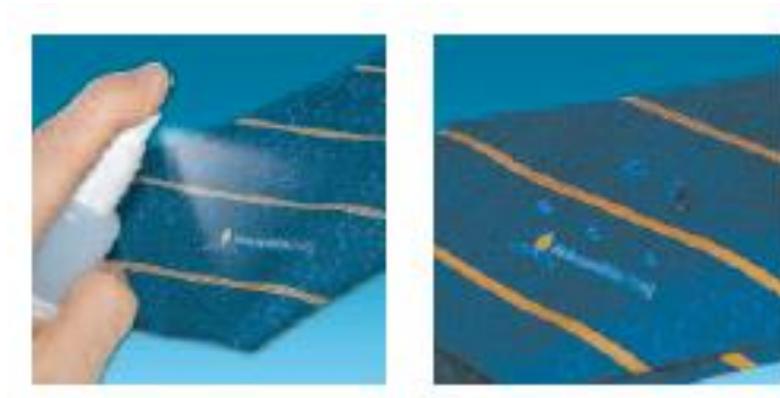

## Srednja šola

- Biologija: Zgradba in delovanje rastlin
- Kemija: Lipidi

Medpredmetno  
povezovanje

# Eksperiment 2 in 3: Hidrofobna površina na lesu ali mineralnih materialih ter tekstilnem materialu

## Eksperiment 4: Nevidno črnilo za steklo – tvorba hidrofilne površine (anti fog)

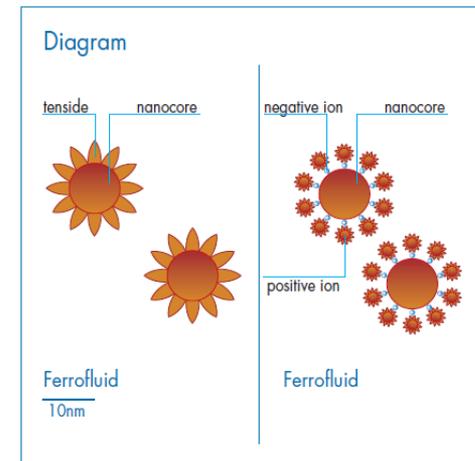

## Eksperiment 5 : Zaščita pred ognjem

# DEMO: Polobla s flip-flop efektom

## Eksperiment 9 : Magnetno polje

## The antibacterial socks - Grade 11 - 13

Silver nano-particles placed into socks eliminate the bacteria which cause smelly feet and fungal infections. Using these socks might make sport's players life much more pleasant ...

1. Click on the buttons to watch the different stages of the animation.
2. Answer the questions related to the animation you have watched by filling in the boxes.
3. Press send to share your answers with other participants.

**The Problem** [Click for the solution](#) [Click for the effect](#) [Summa](#)

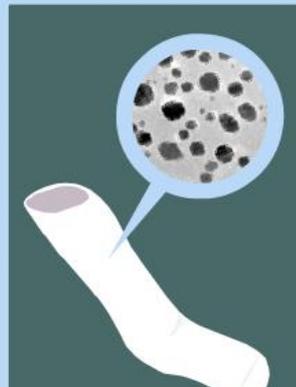

### The problem

After playing tennis my socks smell.

### The solution

Silver nano particles placed in socks eliminate the bacteria which cause smelly feet.

### The effect

Silver nano particles can get washed out into the water systems and pollute the environment.

Name:    
School:    
Country:  

Is it right to buy antibacterial socks?

What is your opinion? 

Please justify your opinion: 

!?

### The problem

When you brush your teeth, you leave millions of germs on your brush.

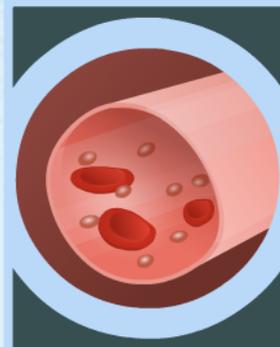

### The solution

Nano antibacterial toothbrush are made of nano silver nanoparticles that kills 99.7 percent of those germs within six hours after the brush has been used.

### The effect

There is a lack of information on the effects of nano particles entering our body.

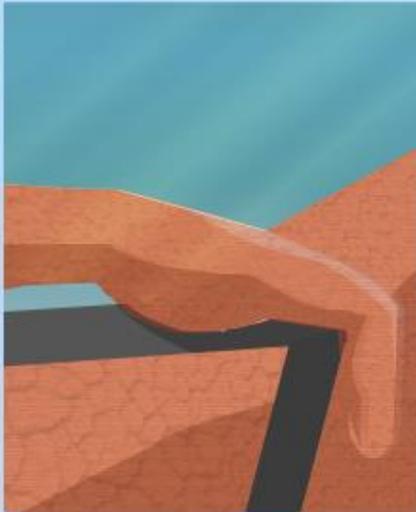

# Diskusija: „Nano“ sončne kreme

## The problem

It is important to use something to protect our skin from the sun, but using regular sunscreen makes us ridiculously white.

## The solution

sunscreens containing nanoparticles of titanium oxide are excellent at absorbing the sun's harmful UV rays while leaving us looking natural.

## The effect

Some nanoparticles may be absorbed through the skin.

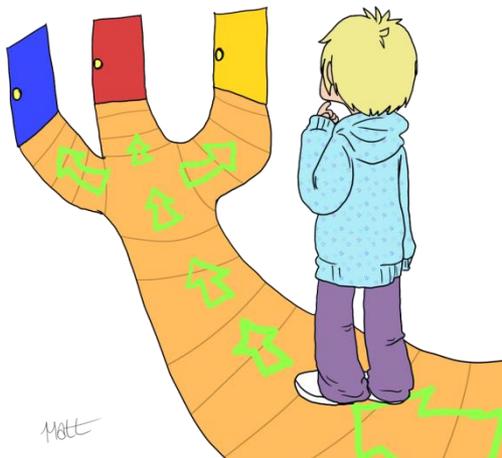

!?

# POZOR: ČAS ZA KRITIČNO MIŠLJENJE!

Kritični mislec se vplete v dogajanje z **razmišljujočim skepticizmom**, usmerjenim v odločitev o tem, v kaj verjeti ali kaj storiti. (Ennis → Halonen v Rupnik Vec, 2011)

“Do not indoctrinate your children. Teach them how to think for themselves, how to evaluate evidence, and how to disagree with you.”

(Richard Dawkins)

**HEPA**  
up to 99.97% efficient to 0.3 microns

**FILTER TYPE**

Particle size in microns: 0.01, 0.05, 0.1, 0.5, 1, 5, 10, 15  
common air filters

Sentry Air Systems

# HEPA FILTRI ... ULPA FILTRI

HEPA- High Efficiency  
Particulate Air

ULPA - ultra-low particulate air

Filtra zadržita delce z velikostjo nad  
300 nm, najboljši pa nad 100 nm.

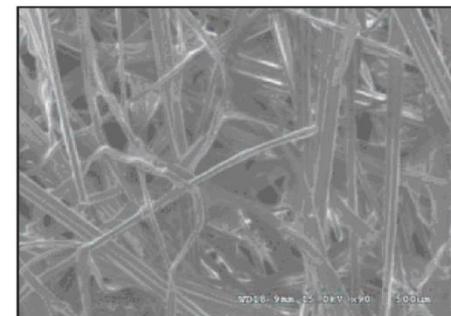

Oznake na filtrih:

- P100 – filter zadrži 99,97 % nanodelcev z velikostjo več kot 300nm
- P95- – filter zadrži 95 % nanodelcev z velikostjo več kot 300nm

Classification	Filter type	Percentage efficiency at MPPS
E10	HEPA	≥ 85
E11	HEPA	≥ 95
E12	HEPA	≥ 99.5
H13	HEPA	≥ 99.95
H14	HEPA	≥ 99.995
U15	ULPA	≥ 99.9995
U16	ULPA	≥ 99.99995
U17	ULPA	≥ 99.999995

# Delovanje vlaknastih filtrov

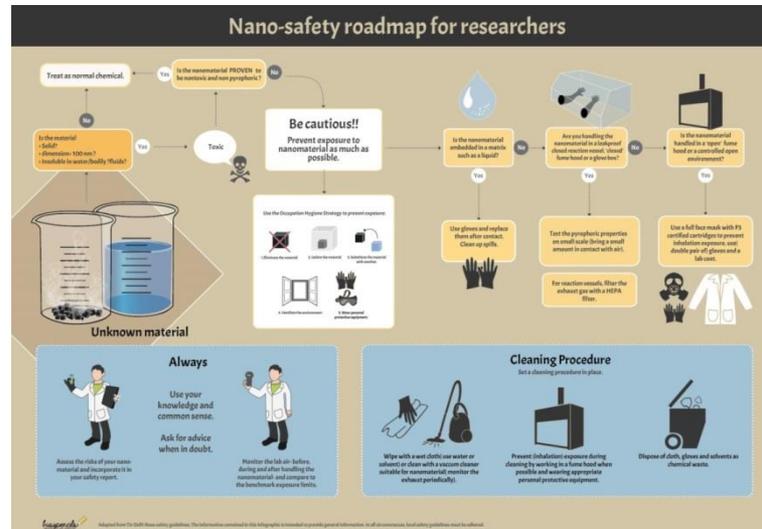

Kvaliteta filtra se podaja s % delcev z velikostjo 300 nm, ki jih filter prepusti.

Kako naj bo zaščiten „nano“znanstvenik, delavec...?

# Priporočena osebna zaščita za znanstvenike: rokavice, očala, maske s HEPA filtri

P- stavki

## Exploring Tools—Dress Up Like a Nanoscientist

Try this!

1. Have a friend stand a few feet in front of you. If they want, have them put on a pair of goggles. Hold up the “Dress Up Like a Nanoscientist” card in your hand and align your friend’s face with the cutout.
2. Imagine your friend as a future nanoscientist! If you have a camera (or a phone with a camera), take a picture!

*Tip:* To keep things in focus, you may need to hold your arm straight out and have your friend move further back away from you.

# NAMESTO ZAKLJUČKA

Pravkar kupujete avto...

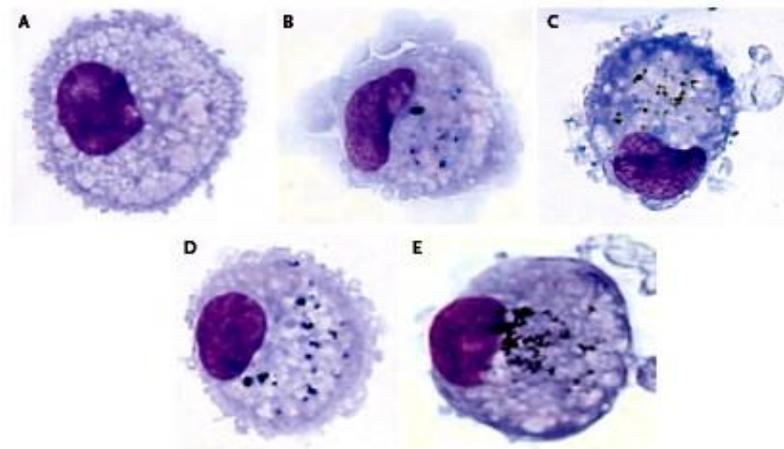

Boste kupili diesla ali...?

# Zakaj ne diesla?

Ogljik iz dieselskih motorjev škoduje delovanju pljuč pri zdravih otrocih  
(The New England Journal of medicine, July 6, 2006)

Jonathan Grigg

Razpolovna doba za ogljikove delce v makrofagih je 3.9 mesecev. Vsak  $1 \mu\text{m}^2$  ogljika v makrofagih povzroči 17 % zmanjšanje siljenega izdiha v sekundi.

V primerjavi z bencinskimi motorji, diesel motorji proizvajajo manj  $\text{CO}_2$ , ampak **več  $\text{NO}_x$  in nanodelcev**. Študije na podganah so pokazale, da visoke doze črnega ogljika iz dieselskih motorjev povzročajo pljučnega raka. Mehanizem nastanka raka je povezan z visokimi dozami nanodelcev in z obremenitvijo pljuč zaradi nalaganja ogljika.

Ne kadim,  
a vedno vžgem!

Loesje

**HVALA ZA POZORNOST**
