# GLOBAL REPORT ON DIABETES

## BOX 1. VOLUNTARY GLOBAL TARGETS FOR PREVENTION AND CONTROL OF NONCOMMUNICABLE DISEASES TO BE ATTAINED BY 2025

(1) A 25% relative reduction in the overall mortality from cardiovascular diseases, cancer, diabetes, or chronic respiratory diseases

(2) At least 10% relative reduction in the harmful use of alcohol, as appropriate, within the national context

(3) A 10% relative reduction in prevalence of insufficient physical activity

(4) A 30% relative reduction in mean population intake of salt/sodium

(5) A 30% relative reduction in prevalence of current tobacco use

(6) A 25% relative reduction in the prevalence of raised blood pressure or contain the prevalence of raised blood pressure, according to national circumstances

(7) Halt the rise in diabetes and obesity

(8) At least 50% of eligible people receive drug therapy and counselling (including glycaemic control) to prevent heart attacks and strokes

(9) An 80% availability of the affordable basic technologies and essential medicines, including generics, required to treat major noncommunicable diseases in both public and private facilities

# Political declaration of the third high-level meeting of the General Assembly on the prevention and control of non communicable diseases

Time to deliver: accelerating our response to  
address non communicable diseases for the  
health and well-being of present and future  
generations

third high-level meeting of the General Assembly on the prevention  
and control of non-communicable diseases on 27 September 2018

United Nations

**General Assembly**

United Nations

**General Assembly**

- Recognize that action to realize the **commitments** made for the prevention and control of non-communicable diseases is **inadequate** and that the **level of progress and investment to date is insufficient** to meet target 3.4 of the Sustainable Development Goals and that the world has yet to fulfil its promise of implementing, at all levels, measures to reduce the risk of premature death and disability from non-communicable diseases;
- Express grave concern that the huge human and economic cost of **non communicable diseases contributes to poverty and inequities** and threatens the health of peoples and the development of countries, ...

third high-level meeting of the General Assembly on the prevention and control of non-communicable diseases on 27 September 2018

United Nations

**General Assembly**

- Strengthen health systems and reorient them towards the achievement of universal health coverage and improvement of health outcomes, and **high-quality, integrated and people-centred** primary and specialized health services for the prevention, screening and control of non-communicable diseases and related mental health disorders and other mental health conditions throughout the life cycle,
- including access to safe, affordable, effective and quality essential **diagnostics, medicines, vaccines and technologies, and palliative care**, and understandable and high-quality, patient-friendly **information** on their use, as well as **health management information systems** and an adequate and well-trained and equipped **health workforce**

Data is useless without purpose

# What do we do in Public Health ?

- **Assessment**

- **Scoping public health problems**
- Priorities and ethics in health care
- **Assessing health status**
- **Assessing health needs**
- Assessing health impacts
- Economic assessment

- **Data and information**

- **Understanding data, information, and knowledge**
- Information technology and informatics
- Qualitative methods
- Epidemiological approach and design
- Statistical understanding
- Inference, causality, and interpretation
- **Finding and appraising evidence**
- Surveillance
- **Investigating clusters**
- **Health trends: registers**

- **Direct action**

- Communicable disease epidemics
- **Environmental health risks**
- Protecting and promoting health in the workplace
- **Engaging communities in participatory research and action**
- Emergency response
- Assuring screening programmes
- Genetics
- **Health communication**
- **Public health practice in primary care**

- **Policy arenas**

- **Developing healthy public policy**
- **Translating evidence to policy**
- **Translating policy into indicators and targets**
- **Translating goals, indicators, and targets into public health action**
- Media advocacy for policy influence
- Influencing international policy
- Public health in poorer countries
- Regulation

# What do we do in Public Health ?

- **Health care systems**

- **Planning health services**
- **Funding and delivering health care**
- Commissioning health care
- Controlling expenditures
- Using guidance and frameworks
- Health care process and patient experience
- Evaluating health care technologies
- **Improving equity**
- **Improving quality**
- **Evaluating health care systems**

- **Personal effectiveness**

- Developing leadership skills
- Effective meetings
- Effective writing

- Working with the media
- Communicating risk
- Consultancy in a national strategy
- Improving your professional practice
- Activism
- Innovation

- **Organizations**

- **Governance and accountability**
- **Programme planning and project management**
- Business planning
- Partnerships
- **Knowledge transfer**
- Health, sustainability, and climate change
- Workforce
- **Effective public health action**

# A health system-based definition (WHO-Europe)

- **Integrated health services delivery:**
  - an approach to strengthen **people-centred health systems** through
  - the promotion of the **comprehensive delivery of quality services** across the life-course,
  - designed according to the **multidimensional needs** of the **population and the individual** and
  - delivered by a **coordinated multidisciplinary team of providers** working across **settings and levels of care**.
- It should be effectively **managed** to
  - ensure **optimal outcomes** and
  - the **appropriate use of resources** based on the **best available evidence**, with **feedback loops** to continuously **improve performance** and to tackle upstream causes of ill health and to promote well-being
  - **through intersectoral and multisectoral actions**

# Indicators

DELSA/ELSA/WD/HTP(2004)15

Selecting Indicators for the Quality of Diabetes Care  
at the Health Systems Level in OECD Countries

Sheldon Greenfield, Antonio Nicolucci  
and Soeren Mattke

Area	Indicator Name
Processes of diabetes care	Annual HbA1c testing
	Annual LDL cholesterol testing
	Annual screening for nephropathy
	Annual eye exam
Proximal outcomes	HbA1c control
	LDL cholesterol control
Distal outcomes	Lower Extremity Amputation Rates
	Kidney Disease in Persons with Diabetes
	Cardiovascular mortality in patients with diabetes

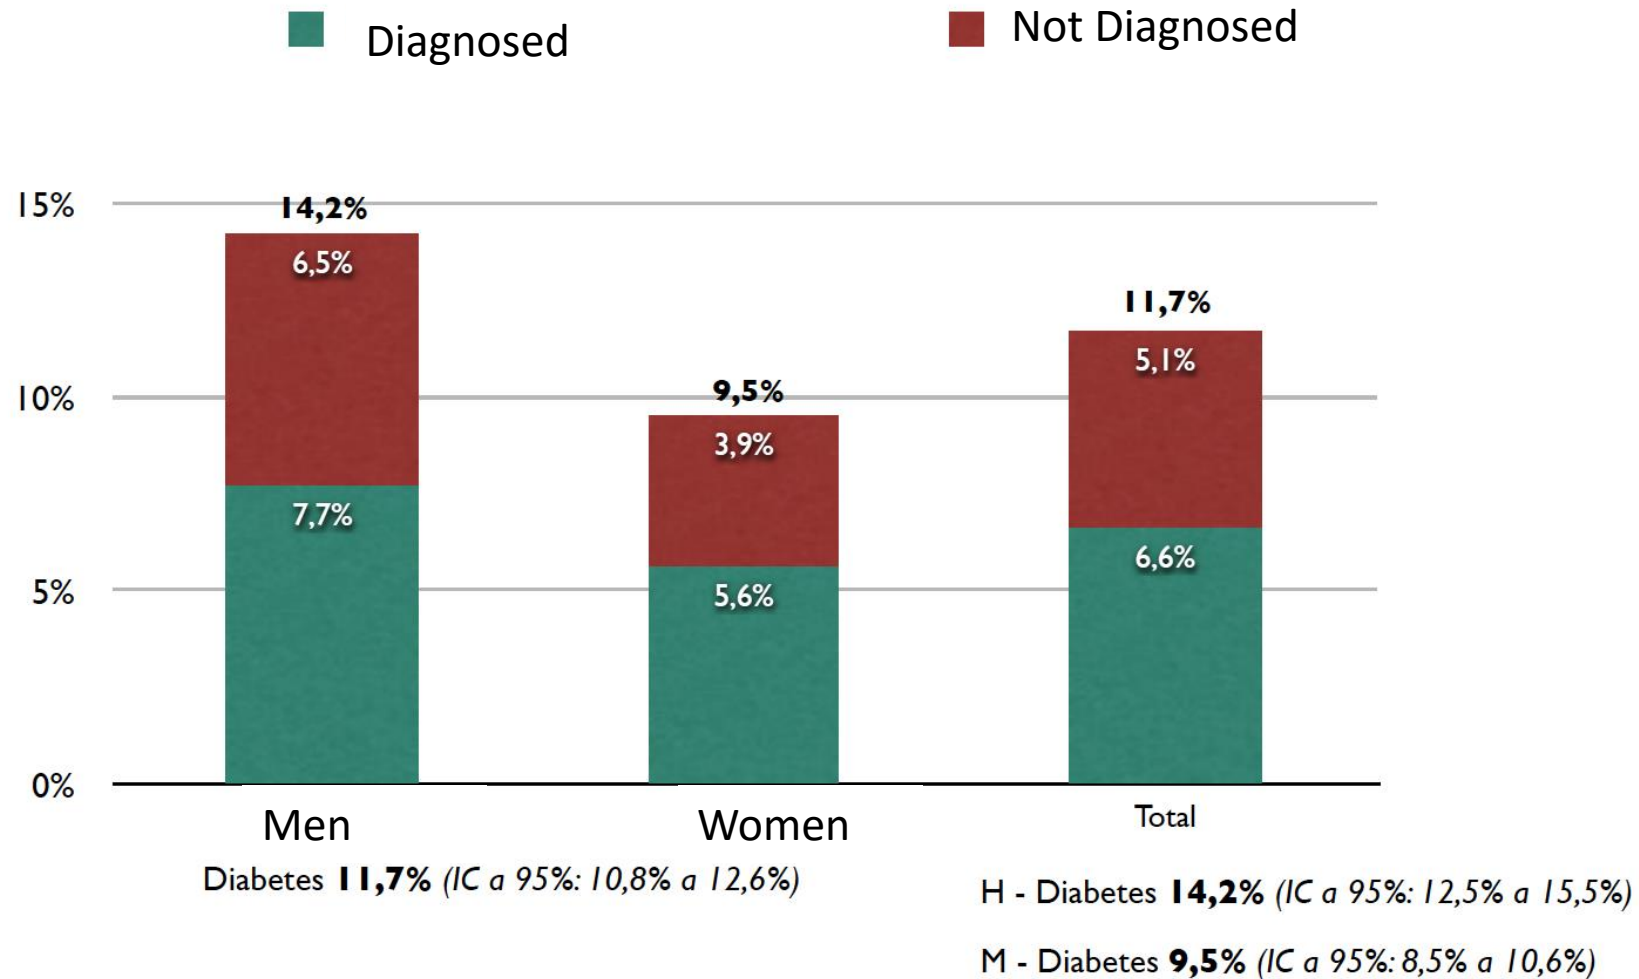

# Diabetes indicators in primary care (Portugal, 2017)

1. Proportion of people with DM with flu vaccination
2. Proportion of people with DM with yearly foot observation
3. Proportion of people with DM, with therapeutic registries (3 items)
4. Proportion of people with DM with nursing consultation
5. Proportion of people with DM with 2 A1c
6. Proportion of people with DM with A1c <8.0%
7. Proportion of people with DM with eye exam
8. Proportion of people with T2D on insulin
9. Proportion of people with T2D on metformin
10. Proportion of people with DM with adequate follow-up
11. Proportion of people with T2DM with follow-up commitment
12. Proportion of people with DM with A1c < 6.5% (age <65 yrs)
13. Ratio expenses DPP4i/oral drugs in T2DM
14. Proportion of people with DM with microalbuminuria
15. Proportion of people with diabetes with foot ulcer risk assessment
16. Proportion of people with risk assessment for T2DM (last 3 yrs)
17. Proportion of people with T2DM with indication for insulin
18. Proportion of newly diagnosed T2DM starting metformin
19. Ratio DDD DPP4i/oral drugs
20. Cost on medication per person with T2DM
21. Cost on medication per person with controlled T2DM
22. Hospitalization rates per non-controlled diabetes
23. Hospitalization rates for acute complications
24. Hospitalization rates for chronic complications
25. Hospitalization rates for mputations

Total: 365 indicators
