

## CONCLUSION OF SERIES OF PUBLIC LECTURES

Ljubljana, 30<sup>th</sup> May 2016

We organized a series of public lectures in the framework of MOČ project, which is financed from Norwegian Financial Mechanism 2009-2014. During the preparation of these lectures, we thought about different target groups, thus, we connected with Slovenian Diabetes Association and carried out 8 lectures in the cooperation with their local associations. We will carry out one lecture in June 2016 due to a postponed date. In this way, we were able to address members of general public who are from vulnerable groups. We implemented 5 lectures in educational institutions, which were interested in the topic. The lectures were a part of the Dissemination work package, which is aimed at the destigmatization of mental problems in public.

	PLACE	DATE	LECTURER
1.	Koper	25.11.2015	prof. Diego de Leo
