

ACKNOWLEDGMENT

We would like to acknowledge and thank all subjects participating in the survey.

CONFLICTS OF INTEREST

The authors declare that no conflicts of interest exist.

FUNDING

The study was financed by the Norway Grants and Government Office for Development and European Cohesion Policy in Slovenia (No. 4300-367/2014). RB was partly supported by the Slovenian Research Agency (Methodology for Data Analysis in Medical Sciences, P3-0154). ZKK was partly supported by the Slovenian Research Agency (Research in the Field of Public Health, P3-0339).

or

The study received no funding.

ETHICAL APPROVAL

Ethical approval to conduct the study was obtained from the National Medical Ethics Committee of the Republic of Slovenia (NMEC), No. 0120-48/2021/3.

or

Ethical approval was not required for this study, as it did not involve any contact with human or animal subjects and no data was collected or used from any individual person.

INFORMED CONSENT

Written informed consent was obtained from all individual participants included in the study.

AVAILABILITY OF DATA AND MATERIALS

All data and materials used in this study were collected from publicly available sources and are available upon reasonable request.

or

The data used for this study is available from the National Longitudinal Study of Adolescent to Adult Health database, which is freely available from the University of... The data set includes information on a variety of topics including demographic characteristics, health behaviors, physical health, mental health, and substance use. In addition, the study also includes information on social networks and peer relationships, as well as family relationships. The data set is available in both SAS and SPSS formats.

or

Data sharing is not applicable to this article as no datasets were generated or analysed during the current study.

AI USAGE STATEMENT

During the preparation of this article the author(s) used the GPT language model to:

- review and amend grammatical and spelling mistakes,
- ensure linguistic consistency and coherence,
- test and fine-tune the article's wording,
- format the references.

After using this model, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.

PREPRINT STATEMENT

The preprint has been deposited in the preprint server (include the name of the preprint server), and is available from (include the DOI or URL of your preprint).
